With KÜNG-futse to heaven

Dear Friends, Ladies and Gentlemen:

We Westerners all know about Confucius, meaning KUNG futse, Lao tse etc. who are the old spiritual philosophers of China called futse, meaning “masters”. Even today mastership is the highest objective for all professionals and sportsmen and even those who look as in earlier times to reach a higher spiritual level.

Of course, mastership also means perfection. Regarding longevity, perfection can never be reached, but it is a continuous challenge for all who strive to be best. It was obvious in the Olympic games Beijing 2008.

Looking at the wonderful temple palace in Beijing I found that this palace is a symbol for yearning to the highest mastership. It challenges you to do all in life for coming up there.

When sponsoring the World Ethos Idea (*) and seeing all the blessings of my life it made me think and feel with highest gratefulness looking upwards.

Let me tell you what happened to me tow days ago.

In spite of being a bad sleeper I had a dream when my wife and I were on Lufthansa flight to Beijing enjoying their heavenly First-class in the big 380 Airbus plane. Professor Küng was sleeping only a few meters away from me.

It is peculiar that often when I am on such long distance flights above 10.000 meters close to heaven I enjoy inspirations and new ideas. And here, now, right over Siberia I had dream. **I was in the heaven from which i dreamed** when I visited Beijing's heaven palace 3 months ago.

In my dream I placed my foot over the step of the heaven`s palace all of a sudden a wind gust blew through the door and lifted me up to heaven, where I was looking for my late years beyond now 80. So suddenly there my dream became real.

What did I see and learn in the 100 years there ? I was welcomed, but not alone.

After some time I met even Jesus and other saints there. Asking God why he did not leave Jesus on earth where they need him so urgent he explained angrily the earth historic happenings and added: *"If I had not taken him on my side he would still rotate in his grave when seeing there what my mankind made out of his divine message"*.

Looking down to earth I saw over hundreds of years afte my lift to heaven a lot of astonishing things happen beyond my earth time. But astonishing also something changed during these years. Looking around in heaven I found that more and more Chinese persons came up. When I talked to them I heard that some decades earlier in the year 2000 their old wisdoms of KUNG-futse were revived in the soul of Chinese people and helped them to become one of the peaceful, happy and even most successful nations in global competition.

When I asked to know more they told me that a few years after 2000 a new master came with a new message. The holy man and master was named KÜNG-futze and his philosophy was called "Worldethics".

Building this on the fundamentals of their old traditional Chinese wisdoms KÜNG-fuze made them realise, that the roots of all their old, different and querulent religions were more or less identical. When he implanted it in the minds of the old BEIDA University they succeeded to distribute it nationwide follwing the the thousand years old Chinese yearning for peace and harmony.

The Chinese government was extremely happy to finally have a medicine to unite hearts and minds of their great nation

Gradually it became clear to all: Why fight each other any more when we have tge same belief, hope and trust? Why not follow these Worldethos message?

The goodwill accompanying it helped learning to follow those basics and finally they learned to live more and more in harmony, peace and happiness. So, all the conditions to come to heaven were fulfilled with this message of this Küngfuze with his World Ethos Idea.

I could tell Professor Küng my dream when we were both leaving the aircraft in Beijing and when seeing his smile I realised that we both had been in heaven or close to it during the last few hours.

Back on earth I did not tell our friends what had happened in those hundreds of years when I looked down from heaven.

However now, back on earth today in reality, I try to make them realise what`s happening and beginning today when we now found the World Ethos Institute at the famous Beijing University and I tried to explain them what a wonderful, but extremely challenging task they will have to master when striving for the vision which Küngfuze now implants in the Chinese hearts and minds.

**So, even being on earth again I have a dream
The World Ethos Dream.**

Prof. Küng (the later KÜNG-futse) **with my "angel" Brigitte and Prof. TU Weiming** in between - "who has to do the job"
